Instructions for Learning

This multi-day conference features keynote sessions, breakout tracks, specialized forums, and networking opportunities delivered in a live, in-person format. The conference includes general sessions providing industry-wide context and vision, as well as focused educational tracks covering financial operations, specialty services, leadership development, and workforce management. Sessions incorporate case studies, peer-to-peer learning opportunities, and presentations from diverse industry experts. To claim continuing education credits, participants must attend the sessions and complete a post-activity survey reflecting on the conference content, its applicability to their professional roles, and overall educational value. Throughout the conference, participants will learn actionable strategies to improve ASC business, clinical, operational, and strategic performance in response to evolving industry demands.

STATEMENT OF NEED:

The need for this education is supported by current literature and industry trends showing that while ASC service volumes and reimbursement are rising, centers face persistent operational inefficiencies, workforce shortages, regulatory hurdles, and supply chain disruptions. Many ASCs are not yet equipped to handle increasing procedural complexity, nor are they consistently optimizing scheduling, turnover times, or revenue cycle processes. ASC executives and administrators have expressed strong demand for strategies to grow through specialty expansion, improve resilience, and maintain independence amid consolidation pressures. Evolving reimbursement policies, heightened regulatory oversight, and growing demand for outpatient surgical services further demonstrate the necessity of practical, solution-oriented education for ASC leaders.

LEARNING OBJECTIVES:

After participating in this activity, learners will be able to:

1. Implement strategies to respond effectively to financial and regulatory pressures facing ambulatory surgery centers
2. Utilize benchmarking data and operational metrics to identify and address areas for improvement in ASC operations
3. Develop and execute strategies to adapt to growing procedural complexity and specialty expansion while maintaining high standards of patient care
4. Apply best practices in revenue cycle management, workforce development, and operational efficiency to enhance organizational performance and financial sustainability

Target Audience:

This activity is suitable for Physicians and other healthcare professionals. This conference is specifically designed for senior and executive leaders within ambulatory surgery centers, including administrators, physician-owners, financial and operations officers, and specialty leaders in areas such as orthopedics, cardiology, and gastroenterology. These professionals are responsible for strategic planning, operational oversight, clinical quality, financial sustainability, and workforce leadership within their organizations.

Disclosure Declaration

It is the policy of Pinnacle Conference, LLC, to ensure independence, balance, objectivity, scientific rigor, and integrity in all of their CE activities. Faculty must disclose to the participants any relationships with commercial companies whose products or devices may be mentioned in faculty presentations, or with the commercial supporter of this CE activity.
